

Niclas Braun

Founder & CEO, For Safety Group Inc. (4SI)

AI SAFETY · AI GOVERNANCE · PHYSICAL TRUST
VERIFICATION INFRASTRUCTURE · POST-QUANTUM TRUST

APPROVED BIOGRAPHY

Niclas Braun is a technology entrepreneur and the founder and CEO of 4SI. His work focuses on AI governance, verification infrastructure and the trust boundary between digital authority and physical reality, including how identity, authenticity and authorization can remain dependable in AI-driven and post-quantum environments.

INTERVIEW TOPICS

- 01 Enforceable authority for AI agents
- 02 Identity, authenticity and authorization
- 03 Physical trust in synthetic-media environments
- 04 Post-quantum continuity of identity and authority
- 05 Human responsibility in autonomous systems

SCOPE

Available for non-confidential written commentary, interviews and panels. Protected implementation details, product architecture and undisclosed projects remain outside scope.
